

Activities Report for March Quarter 2024

Highlights

- Field programs being planned to follow up high priority gold targets identified on the northern tenements at the Green Rocks Project
- Auger program across its exploration licences planned at the Company's Yendon Project
- Ongoing identification and review of new opportunities to strengthen the Company's existing asset portfolio

Peak Minerals Limited (ASX: PUA) (Peak or the Company) is pleased to provide its activities report for the quarter ended 31 March 2024.

Western Australian Projects –Green Rocks and Earahedy Projects

The Green Rocks project consists of approximately 260km² of contiguous landholding located southeast of Meekatharra, Western Australia.

During the March 2024 quarter, the Company completed its review of all historical geophysical and geological databases across its existing tenement package. With a recent increase in the gold price, coupled with increased exploration activity in the region following discoveries by Great Boulder Resources Ltd (ASX: GBR) at the neighbouring Side Well Gold project, the Company's focus has been the gold potential within the northern tenements of the Green Rocks project.

This review has highlighted numerous targets along the extensions of the two styles of mineralisation at Side Well, being the Mulga Bill style intermediate sulphide mineralisation and the Ironbark-style defined along the eastern corridor of the Polelle syncline.

Geological Survey of Western Australia mapping has shown the felsic volcanic and volcanoclastic rocks, which host the Mulga Bill mineralisation in the core of the Polelle syncline, extend south into a package of prospecting licences forming the northern extent of the Green Rocks project.

To date, GBR have defined a resource of 6,511,000 tonnes at 2.7 g/t Au for 568,000 ounces at its Mulga Bill project, forming the core of a larger global resource of 7,450,000 tonnes at 2.8 g/t Au for 668,000 ounces across its Side Well project (Refer GBR announcement dated 16 November 2023). GBR have identified a Bi-Mo-Ag-Au-Cu geochemical signature at Mulga Bill indicating a magmatic, intermediate sulphidation epithermal system, which can be defined by induced polarization and gravity surveys.

The Company intends to undertake a preliminary soil sampling program over the defined targets to determine if geochemical anomalies can be generated through the weathering profile, with air core drilling to follow if the weathering profile is deemed to be too deep. The Company will also continue to assess next steps for the Earahedy Project.

Victorian Project - Yendon Kaolin Project

The Yendon Kaolin project is located in the Ballarat-Bendigo zone of the Western division of the Lachlan Fold Belt. The Company holds four licences in total: three exploration licenses (EL5457, EL6428 and EL8081) and one retention license (RL6734) approximately 14 kms south-south-east of Ballarat, Victoria (Figure 2). RL6734 provides the licensee with tenure over the land before progressing to a mining license.

During the March 2024 quarter, the Company commenced preliminary field work on ground including submitting permitting applications for drilling. All permits have now been approved and the Company will undertake reconnaissance drilling across its exploration licences during Q2, 2024.

In 2018, a resource was completed at the Yendon Kaolin Project of **3.7Mt of 34.7% Al₂O₃** material with low level impurities such as Fe₂O₃, Na₂O and TiO₂ (Table 1).

Corporate

Cash balance and reduction in expenditure

As noted in the Appendix 5B for the quarter ended 31 March 2024, the Company held cash of approximately \$157,000. As a result of the current cash balance, the Company has continued to focus on the reduction of its operational expenditures until such time a capital raising can be completed. Director and Company Secretary fees continue to be on hold until such time a capital raising is completed.

Capital Structure

The Company's current capital structure is outlined below:

Number	Securities
1,041,376,617	Ordinary Fully Paid Shares
22,500,000	Unquoted Options exercisable at \$0.03 each, expiring on or before 31 December 2024
22,500,000	Unquoted Options exercisable at \$0.05 each, expiring on or before 31 December 2024

Disclosures in relation to Appendix 5B

As of 1 July 2023, the Directors and Company Secretary elected to put their fees on hold until completion of a capital raising. Therefore, in line with its obligations under ASX Listing Rule 5.3.5, the Company notes that no payments were made to related parties of the Company for the quarter ended 31 March 2024.

During the quarter ended 31 March 2024, the Company spent approximately \$25k on project and exploration activities relating to its Western Australian projects and its Yendon Kaolin project. This expenditure predominantly relates to consultant costs assisting with review of the Company's WA tenement package, ongoing tenement maintenance and rehabilitation costs. The exploration expenditure represents direct costs associated with these activities as well as wages which can be directly attributable to the exploration activities.

Changes in Tenements held during the Quarter

In accordance with its obligations under ASX Listing Rule 5.3.3, the Company has provided a list of tenements held at 31 March 2024 at Appendix A. There were no acquisitions or divestments noted during the quarter.

This announcement is authorised by the Board of Peak Minerals Limited.

Competent Person's Statement

The information contained in this announcement that relates to geology is based on, and fairly reflects, information compiled by Mr Andrew Taylor, who is a Member of the Australian Institute of Geoscientists. Mr Taylor is a consultant of Peak and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Taylor consents to the inclusion in this announcement of the matters based on his information in the form and context in which it appears. Mr Taylor holds securities in the Company.

The mineral resource estimates in this announcement were reported by the Company in accordance with listing rule 5.8 on 12 February 2018. The Company confirms it is not aware of any new information or data that materially affects the information included in the previous announcement and that all material assumptions and technical parameters underpinning the estimates in the previous announcement continue to apply and have not materially changed.
